Bethesda, Maryland 20814-2160

Dear EoMM Committee Chair,

I am writing on behalf of the Maine GIS Users Group (MEGUG) to pledge \$500 to the Evolution of Modern Mapping Project. The project aligns very well with the mission of MEGUG. The program to be delivered through the public broadcasting network will help the public, including decision-makers, understand the importance of geospatial data and technology in everyday life. People viewing the program will gain perspective on how heavily dependent we are on geospatial technology for both work and play.

Claire Kiedrowski, President of Kappa Mapping, Inc in Bangor, Maine and current MEGUG Board member, brought this project to the attention of the Board this fall. We are grateful that she did as we find the project very exciting and feel very strongly that the deliverables will support the work of our membership.

Please keep us informed as the project progresses and let me know when and where the check should be sent.

Sincerely,

Dan Walters, Chairman
